BACKGROUND

General Information: Light Rail Lofts proposes the Adaptive Reuse and New Construction of an abandoned building located at 4600 Main Street, Houston, Harris County. The application was represented to have a preference for veterans in a general population development. 26 USC §42(g)(9) states that it is not a violation of the general public use requirement if a preference is given to members of a specified group under a Federal Program, in this case the HOME program as described in 24 CFR Part 92. Furthermore, the Development will otherwise conform with the Department’s rules concerning affirmative marketing and tenant selection criteria. Additionally, the ground floor of the development will be converted for use as office space by the U.S. Department of Veterans Affairs to provide services to tenants and members of the general public that are veterans. The development will consist of 56 efficiency units, of which three of the units will be rent and income restricted at 50% of the Area Medium Family Income (“AMFI”) and the remaining units will be rent and income restricted at 60% of AMFI. The census tract (4107.02) has a
median household income of $37,103, is in the fourth quartile, and has a poverty rate of 25.7%. The site conforms to current zoning.

**Site Analysis:** The presence of undesirable neighborhood characteristics under §10.101(a)(3) requires additional site analysis and those characteristics attributable to the Light Rail Lofts include the middle school failed to achieve a Met Standard in 2017 and the development is located within 1,000 feet of a vacant structure that is in significant disrepair and may be considered blighted.

**School:** Light Rail Lofts is located in the attendance zone of the Gregory-Lincoln Education Center (“Gregory-Lincoln”) which did not achieve a Met Standard rating based on the 2017 and 2016 TEA Accountability Ratings. Gregory-Lincoln serves students from Pre-K through 8th grade but students from the MacGregor Elementary feed into Gregory-Lincoln Education Center. A letter from Erik D. Pruitt, Ed.D, the Area Superintendent for the Houston ISD, was submitted that indicated the middle school is expected to achieve a Met Standard rating in the near future. The 2018 TEA Accountability Ratings were released in August 2018, and Gregory-Lincoln achieved the Met Standard rating. Staff believes the letter from Dr. Pruitt, combined with the recently released rating, provide sufficient mitigation under the rule to deem the application eligible pursuant to 10 TAC §10.101(a)(3) of the Uniform Multifamily Rules.

**Blight:** The applicant disclosed that there is a former auto-repair shop that is located within 1,000 feet from the proposed development that may be considered blighted. According to the applicant, the property has been purchased and the parcel has potential to be redeveloped by the owner of the Light Rail Lofts or a third party entity. The proposed project is located in the Midtown area which is minutes away from Downtown Houston. The Applicant submitted evidence that the City of Houston created the Midtown Tax Increment Reinvestment Zone (“TIRZ”) in 1995 to promote redevelopment in the area and address the physical decline of blighted properties. The Midtown TIRZ has 36 active projects slated for funding in the 2018-2022 Capital Improvement Plan and has $580,000,000 in projects ranging from improvements to infrastructure, land acquisition for parks and affordable housing, street reconstruction, and public art. Although staff does not believe the one blighted property necessitates disclosure under the rule, the documentation provided demonstrates a commitment by the city to the area and provides for sufficient mitigation under the rule such that the development site should be found eligible pursuant to 10 TAC §10.101(a)(3) of the Uniform Multifamily Rules.

**Waiver Request:** A waiver was requested regarding 10 TAC §10.101(b)(6)(A) relating to Unit Sizes. The proposed development will include efficiency units ranging from 314 to 431 square feet. Per this rule, a minimum of 500 square feet is required for an efficiency unit. According to the applicant, the existing building has large structural columns that interfere with the construction of larger units. Building larger unit sizes would entail leaving a structural column in the middle of a unit. Staff believes granting the waiver is consistent with 10 TAC §10.207(1) which speaks to limitations of existing building structural elements for adaptive reuse developments. According to the applicant, granting the waiver better serves the policies and purposes articulated in Tex. Gov’t Code, §§2306.001 and 2306.002 because it will allow the construction of much needed housing for homeless persons that experience difficulty finding suitable affordable housing, and supports the efforts the City of Houston has identified as a priority through the aforementioned HUD Request for Release of Funds and adoption of the resolution regarding the intent to have a preference for the homeless veteran population.

**Organizational Structure:** The Borrower is 4600 Main Street Housing, LP and includes the entities and principals as indicated in the organization chart in Exhibit A. The applicant’s portfolio is considered a
Category 3 and the previous participation was deemed acceptable, with the aforementioned conditions, by EARAC, after review and discussion.

*Public Comment:* There were no letters of support or opposition received by the Department.
